I drive a truck and use the " Instant Traffic & Weather " all the time. The thing is you are driving into a city and start looking for a radio channel that tells yyou about traffic and you have to go through all the stations, if you find one the traffic report does not even tell you what a truck driver needs to know. The " XM Traffic & Weather " is the best thing I have seen in 29 years of driving a truck. So it's up to Ya'll to stop the bill trying stop XM from doing a great job.
